MALAYSIAN INFORMATION NETWORK ON DISABILITY

LICOF started its projects through self-funding among its members. Armed with a HEART and limited income coupled with brilliance of a few smart partnerships and a spreading networking infrastructure, Licof took in a couple of PWD its 'beneficiaries' to empower them to be inclusive in society and to take pride in their ability to earn an income. Omar, does beautiful rattan craft but was unable to expand his scope to encompass a wider market thus his income was limited to a few propectives. Zainab is good in sewing but her talent is curbed by her inability to write and count. Ain is a bright student who has just scored 6As in her She is pretty and aspire to be a doctor...but she wonders if this was possible because she has only one upper limb. Bubba is a Down-Syndrome who loves to paint but still needs to have proper training and guidance for he is unable to communicate. Mohd Taufik has a learning disability, completed school and his mum is worried he is at home and jobless. Others include Hakimi, Devanteran, Murugan, Dhanu, Muniswari. These are only a few of LICOF beneficiaries who need all the help we can give to motivate them to come out and be inclusive in society.

Our Progress to date - LICOF has created an inclusive LICOF Geobeat - a way of expressing lifestyle with percussion instruments

...with PWD who had left school and studying from SMK Kelibang to end up performing music like Gol Nour from the late Cappuccino Band and another musician from Salleh D...  
...ongoing...  
...anyone...
